

“KSU” WiFi Connection Instructions for Ubuntu 10.10:

1. From the list of available wireless networks, choose “KSU”

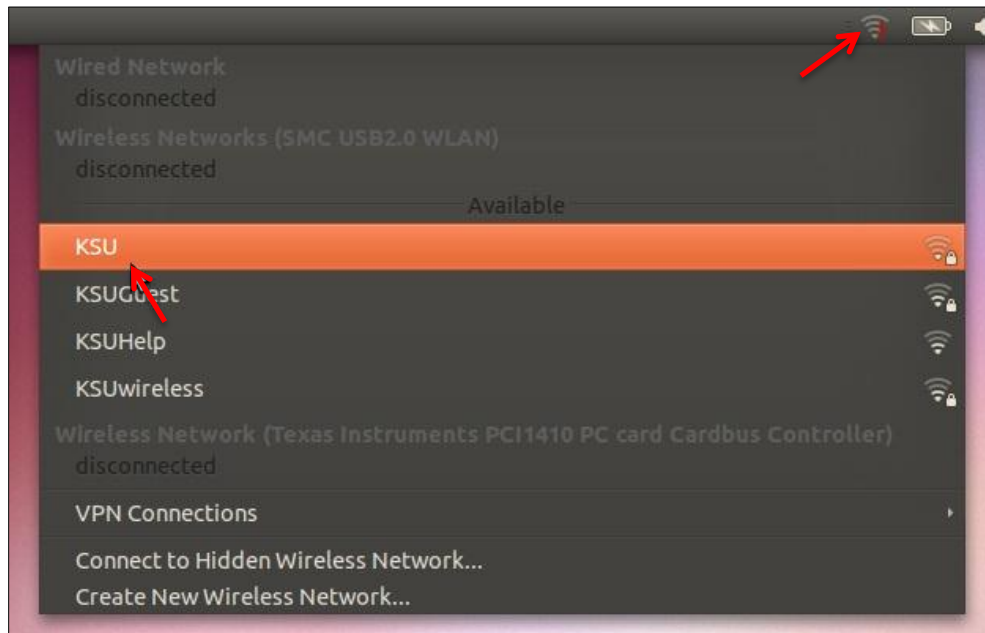

Figure 1 - List of available wireless networks

The **Authentication required by wireless network** window appears.

2. Make sure you are using the correct encryption settings as set below:

Figure 2 - Encryption Settings

****The Username is your NetID and the Password is your NetID password****

3. Click on **Connect**.

The **No Certificate Authority certificate chosen** window appears.

4. Click on **Ignore**.

Figure 3 - No Certificate Authority

****Be sure to check the box next to “Don’t warn me again”**

The **Unlock Keyring** window appears.

5. Type in your **Admin password** and click on **OK**.
